CC106- Application Development and Emerging Technologies

LABORATORY ACTIVITY 2

NAME: CARPESO, KURT FRANCIS O. || BERINGUELA, JIRO C.

STUDENT NO: 23-1874 || 23-2365

YEAR/SECTION: SBIT-3C

DATE: 1-28-2025

SCORE	PERCENTAGE

Instructions

- **Step 1 — Choose the Type of App You Want to Design**

Pick ONLY one:
Option A: Desktop Application
Examples: Calculator, Notes App, File Manager, Media Player
Option B: Web Application
Examples: Student Portal, Online Form, Food Ordering Website
Option C: Mobile Application
Examples: Reminder App, Health Tracker, Mobile Store App
Choose whichever interests you the most.

- **Step 2 — Decide the Purpose of Your App**

Before sketching, answer this question in one sentence:
"What is the main purpose of my app?"
Examples:

"To help students keep track of deadlines."
"To allow users to buy food online."
"To calculate body mass index (BMI)."

This purpose will guide your interface design.

- **Step 3 — Create Your Sketch (UI Mock- up)**

You may draw your sketch using:

Notebook or bond paper
Canva
PowerPoint
Google Drawings
Even MS Paint

Your sketch must include the following:
✔ App Name
A short, clear name (e.g., "QuickNotes", "FitTrack", "CampuShop").
✔ At Least 3 Buttons or Interactive Elements
Examples:

LOGIN, SIGN UP, SUBMIT
PLAY, PAUSE, NEXT
HOME, PROFILE, SETTINGS

✔ Basic Layout of the Screen

Use simple shapes:

Rectangles for buttons
Boxes for text areas
Circles for icons
Horizontal bars for menus

No artistic skill required—clarity is more important than beauty.
✔ Labels or Text
Label what each part does, such as:

"Username Field"
"Menu Bar"
"Search Box"
"Start Button"

- **Step 4 — Add Required Elements Based on App Type**

Here is what students should include depending on the type of app chosen:

- **Option A: Desktop App Sketch Requirements**

Desktop screens are larger, so they should include:
A title bar (e.g., QuickNotes — Desktop App)
A menu bar (File, Edit, View, Help)
Buttons (Add Note, Save, Delete)
A main workspace (e.g., a blank note area)

- **Option B: Web App Sketch Requirements**

Web apps usually have:
A navigation bar at top (Home, About, Services, Login)
A main content area
Forms or buttons (Login, Submit, Search)
Footer (optional)

- **Option C: Mobile App Sketch Requirements**

Mobile screens are smaller, so include:
A top header (App name)
3–5 buttons arranged vertically
Simple icons
Clear text

- **Step 5 — Provide a Short Explanation**

Write 3–5 sentences explaining your sketch:
You must include:
✔ What type of app it is (Desktop, Web, or Mobile)
✔ Who will use it (students, customers, parents, etc.)
✔ What its main purpose is
✔ Why you designed it that way

- **Step 6 — Take a Picture or Screenshot**

If drawn on paper — take a clear photo.
If designed digitally — export or screenshot.
This will be part of your submission.

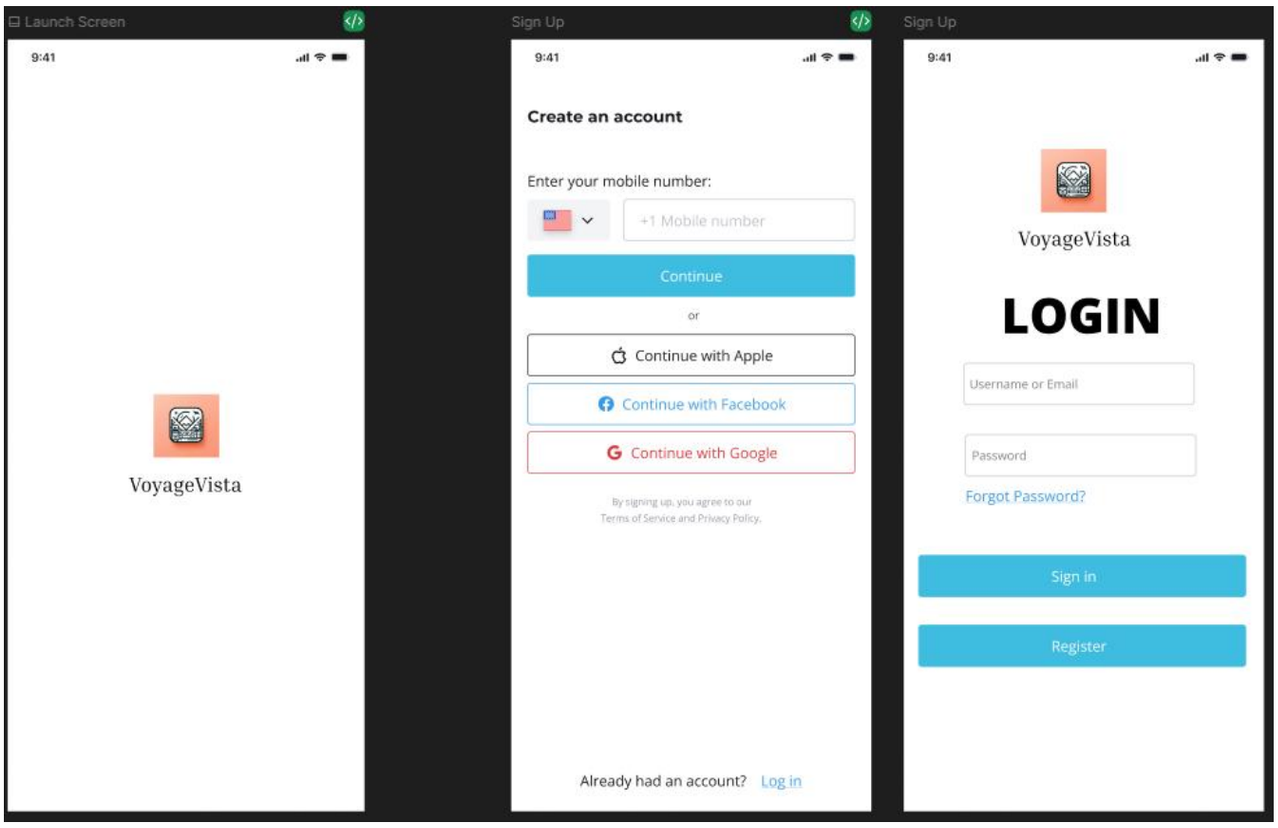
- **Choose the Type of App You Want to Design**

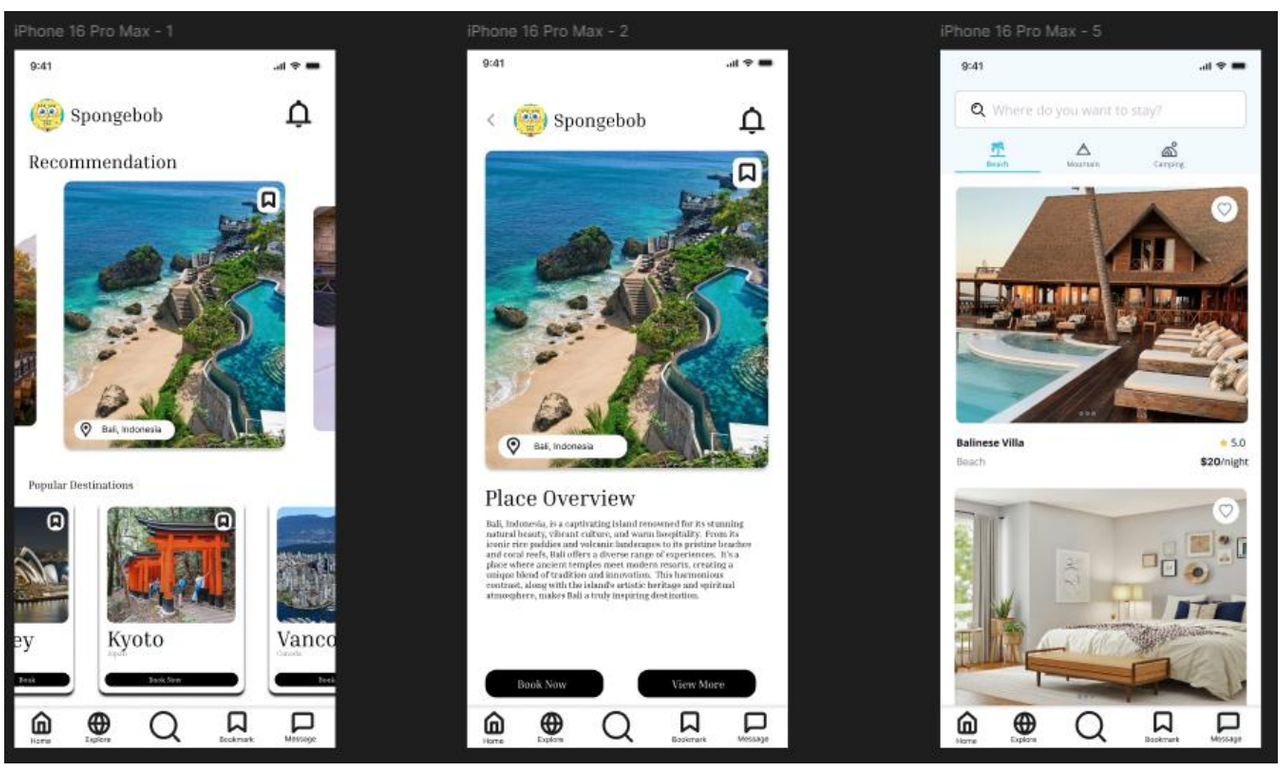
=> Mobile Appilication [**VoyageVista**]

- **What is the main purpose of my app?**

=> The main purpose of our travel booking app is to help users discover popular tourist destinations and easily choose, plan, and reserve their preferred travel experiences in one convenient platform.

- **Write 3–5 sentences explaining your sketch:**

=> My duo designed a mobile application called **VoyageVista**, which focuses on users who want to travel around the world. The application showcases some of the most beautiful tourist destinations that are frequently visited each year. Its main purpose is to help users explore different tourist spots and compare their options. After viewing the destinations, users can choose their preferred location and proceed with reserving their travel plans.




- **Take a Picture or Screenshot**
